Installation Instructions

In case of an inverted thermal insulation where a protection mat is not recommended, install the separation membrane above the thermal insulation with an overlap of ca. 4.0 inch. Cut the slip sheet in situ at roof penetrations. Consider an allowance for overlap and wastage of ca. 10–15 %. Separation Membrane TGV 21 is, included, but not limited to, to be installed according to manufacturer’s instructions, not exposed to UV-light, completely covered. Call manufacturer for further options.
